Bi-amplified and passive loudspeaker enclosures built in 13-layer birch plywood (18 mm/0,7") with a highly resistant scratch-proof paint finish, fitted with high-grade loudspeakers.

A highly technical design.

The entire self-power PSR range uses the innovative **HDD system (High Dynamic Device)**, an "intelligent" integrated system that includes a PWM amplifier for the low frequencies, a **Class G amplifier** for the high frequencies and an exclusive **DSP that can be remote controlled via an IT network** with dedicated software.

The PSR loudspeaker enclosures are real gems of professional amplification.

The HDD DSP system offers a wide range of controls:

- > FIR (Finite Impulse Response) digital equalization for correcting and aligning frequency response and phase
- > Energy supplied by the loudspeakers
- > Woofer throw
- > Optimal polar response by means of a 48dB/oct crossover filter

The PC software dedicated and the NI32 network interface (optional) also enable the system to carry out the following remote functions:

continuous control of status amplifiers, loudspeakers, the temperature of the radiators, input levels, power overloading, ON and OFF function, input sensitivity and selection of the presets, delay time adjustment, volume adjustment, 4-band parametric equalizer.

BI-AMPLIFIED MODELS:

- > High efficiency and powerful **PWM low frequency amplifier**.
- > **Class G high frequency amplifier**
- > **Digital Signal Processor**
- > **Network interface** for connection to PC through the NI 32 (optional)
- > **Woofers and ceramic drivers** boast a state-of-art efficiency, linearity and handling power.
- > Time domain **FIR digital equalization** (Finite Impulse Response)– which corrects not just the frequency response (as with conventional equalizers) but phase linearity to produce an impulse response very close to the ideal. This ensures an improved precision, coherent emission, image and array capability.
- > 48 dB/oct. Linkwitz-Riley crossover to minimize interchannel crosstalk and improve polar response
- > **Dynamic equalization of bass frequencies** ensures the maximum sound pressure while limiting woofer cone excursion
- > “**Energy control**” algorithms which limit amplifier power to the maximum power handling of the speakers while maximizing dynamics.

Speaker Systems

> Connection panel with XLR signal input and link connector, 4-step gain control, GND lift, RJ45 input and through connectors for digital network, 2 sets of dipswitches for delay control - 63.75m (209,15 ft) in 25m (9,84") steps – and the choice of **8 equalization presets for special speaker applications or to adapt speaker performance to match the sound reinforcement environment**

DIP SWITCH to activate a high pass filter in the satellites when using with a subwoofer or to invert the phase in the subwoofer.

> Power supply on Neutrik™ POWERCON input and output connectors for power linking between cabinets, thus avoiding the need of long power cords.

> 13-layer (18 mm/0,7") baltic birch plywood scratch resistant paint finish enclosure.

> **8xM10 anchoring points** for suspended installation and 2 integrated strategically positioned **ergonomic handles**.

PASSIVE MODELS:

> **Internal Dual-Mode passive filter** with inspection window to view the current configuration. System configurations:

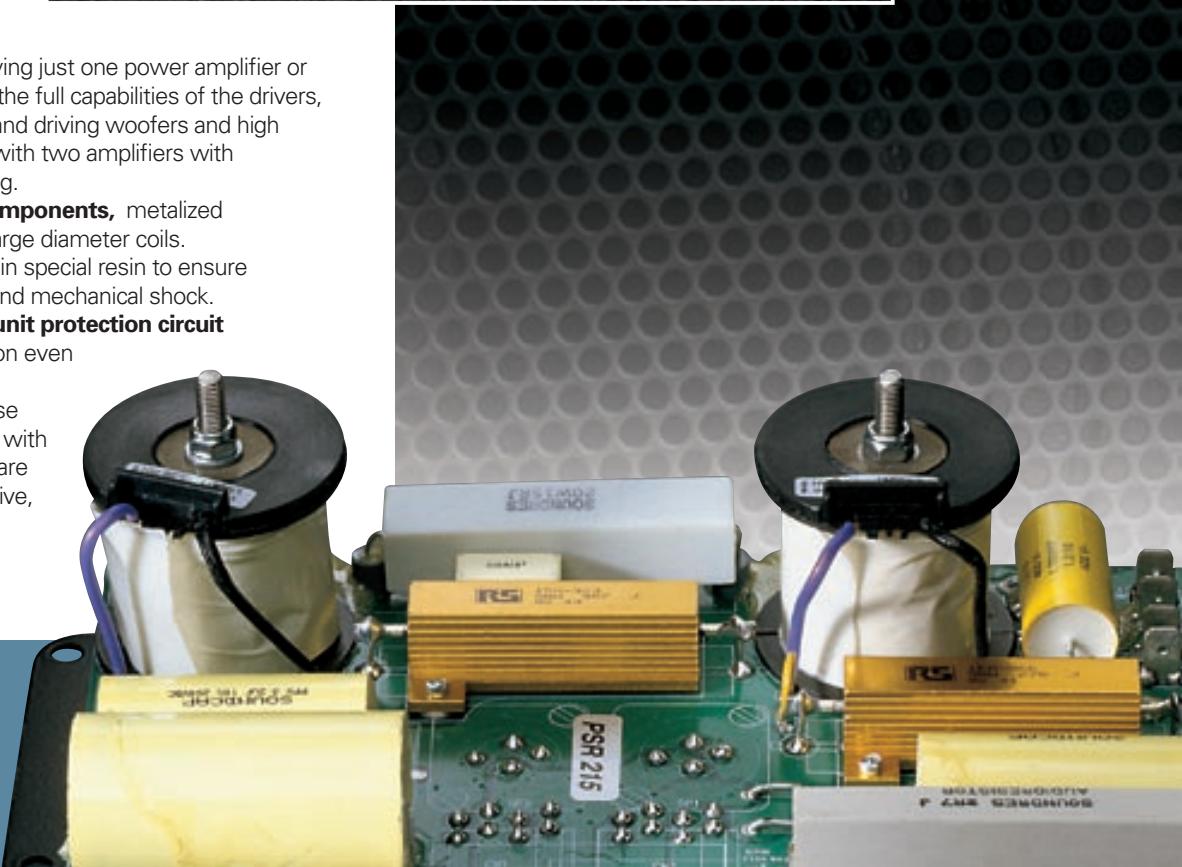

"Full range mode" employing just one power amplifier or

"Bi-amp mode" to exploit the full capabilities of the drivers, excluding the internal filter and driving woofers and high frequency units separately with two amplifiers with appropriate signal processing.

> **Superb quality passive components**, metalized polyester condensers and large diameter coils. All components embedded in special resin to ensure total immunity to vibration and mechanical shock.

> **Soft-trip- high frequency unit protection circuit** that ensures proper operation even in overdrive conditions

> Broad and coherent response over the full coverage angle with mid-range frequencies that are powerful but never oppressive, ensuring optimum speech intelligibility.

- > **Dual-Mode passive filter**
- > NL-4 Neutrik™ speakon connectors

PSR 215a

800W + 300W - 128dB SPL
Processed active
reinforcement loudspeaker

- > 2-way bass reflex, bi-amplified with internal **DSP**
- > High efficiency **800Wrms HDD LF amplifier** featuring **PWM** technology
- > **300Wrms Class G HDD HF amplifier**
- > Custom ceramic **380 mm (15") woofer** with 100 mm (4") diameter coil

PSR 215

800W - 131dB SPL
Sound reinforcement
loudspeaker

- > **B&C titanium compression driver** with 75 mm(3") coil and **51 mm (2") throat**
- > **60°H x 40°V aluminium constant directivity horn**
- > **8 equalization and master delay presets** selectable directly from the rear panel
- > **Digital network interface** for connection to PC
- > **8xM10 anchoring points M10** for suspended installation

PSR 212a

500W + 150W - 125dB SPL
Processed active
reinforcement loudspeaker

- > 2-way bass reflex, bi-amplified with internal **DSP**
- > High efficiency **500Wrms HDD LF amplifier** featuring **PWM** technology
- > **150Wrms Class G HDD HF amplifier**
- > Custom ceramic **320 mm (12") woofer** with 75 mm (3") diameter coil

PSR 212

600W - 129dB SPL
Sound reinforcement
loudspeaker

- > Passive version, **600W/8ohm recommended amplifier** in full range mode or 600W/8ohm + 160W/8ohm in bi-amp. mode
- > **Dual-Mode passive filter**
- > NL-4 Neutrik™ speakon connectors

PSR 118Sa

**1000W - 130dB SPL
Processed active
reinforcement Subwoofer**

- > Vented band pass powered subwoofer with internal **DSP**
- > **1000Wrms HDD amplifier** featuring **PWM** technology
- > Custom ceramic **460 mm (18") woofer with 100 mm (4") diameter coil**
- > **8 equalization and master delay presets** through selectable from the rear panel to optimize the link to the satellite speakers

- > **Digital network interface** for connection to PC
- > **8xM10 anchoring points** for suspended installation
- > Special acoustic load delivers high sound pressure levels (130 dB) while significantly reducing distortion at high volume
- > Designed for low frequencies extension of the PSR line in high SPL applications such as in theatres, live music club venues, band PAs, touring.
- > Optional 4 swivel-mount casters 100 mm ø (3.95") on request.

PSR 118S

**1600W - 135dB SPL
Sound reinforcement
Subwoofer**

- > Passive version, **1600W/4ohm recommended amplifier**
- > External electronic crossover required
- > NL-4 Neutrik™ speakon connectors
- > Optional 4 swivel-mount casters 100 mm ø (3.95") on request.

PSR 212Ma

**500W + 150W - 125dB SPL
Processed active stage
monitor**

- > 2-way coaxial bass reflex, bi-amplified with internal **DSP**
- > High efficiency **500Wrms HDD LF amplifier** featuring **PWM** technology
- > **150Wrms Class G HDD HF amplifier**
- > Custom ceramic **320 mm (12") woofer** with 75 mm (3") diameter coil

- > **B&C titanium compression driver** with 65 mm(2.5") coil and 36 mm (1.4") throat
- > Aluminium horn mounted coaxially to the woofer with **conical 80° dispersion**
- > **8 equalization and master delay presets** selectable directly from the rear panel
- > **Digital network interface** for connection to PC
- > Specifically designed frequency response for nearfield use as stage monitor

PSR 212M

**600W - 129,5dB SPL
Stage monitor**

- > Passive version, **600Wrms/8ohm recommended amplifier** in full range or 600Wrms/8ohm+160Wrms/8ohm in bi-amp configuration.

Completely "manufactured in Italy" the VERVE Series Speakers feature birch plywood enclosures with a scratch & scuff resistant paint finish. FBT VERVE speakers offer outstanding performance at competitive prices. Available in **10 bi-amplified active and 10 passive** touring grade models (5 two-way trapezoidal design speakers, 3 coaxial stage monitors and 2 subwoofers), the VERVE are equipped with high efficiency **custom**

B&C woofers and HF compression drivers, high efficiency **PWM** and class G integrated amplifiers of the latest generation. **Switching power supplies and neodymium magnet woofers** reduce the overall weight for better portability. The **rotatable polypropylene constant directivity horns** allow adjustable H x V angle coverage for speaker array options. Full line of hardware accessories for **permanent installations**.

Bi-Amplified Models

- > **High efficiency Class D (PWM) and G integrated amplifiers**, to maximize the weight/power ratio
- > **Switch mode power supply** in the VERVE 152a, VERVE 15Sa and VERVE 18Sa
- > **Electronic signal processor** to provide several

functions: crossover, equalizer, limiter to supply linear response and protection to the woofers

- > **Dynamic equalization of the low frequencies** for maximum SPL and limiting excessive woofer excursion
- > High S/N ratio, 24 dB/oct. active filters for the pre-amp section
- > Control panel with: **3-band EQ**, volume control and protection LED's
- > XLR balanced input and XLR link for cascade connection of several speakers in parallel

- > **13-layer birch plywood scratch resistant enclosure** and internal bracing to reinforce the cabinet and prevent undesired resonance and vibration.
- > **Robust metal handles**, integrated **stand 35 mm ø (1.38") adapter**.
- > **Fully rotatable constant directivity** horn to adjust HxV angle coverage.
- > Thanks to the fully rotatable horn, 2 or 3 cabinets in a horizontal array set-up increase their dispersion and the maximum SPL.
- > Exceptional dispersion coherence in the whole coverage angle, high SPL and accurate sound reproduction make the VERVE speakers ideal for permanent installations or live sound events.
- > Reduced total weight due to the incorporation of neodymium components, the high efficiency amplifier, the switch mode supply and a light polypropylene horn.

Passive models:

- > **Soft-trip high-frequency protection circuitry** to ensure proper operation even in overdriven conditions.
- > **Superb quality components**, metallic polyester condensers and large diameter coils. All components embedded in special resin to ensure total immunity to vibration.
- > Control panel with **2 parallel NL-4 Neutrik™ speakon connectors**.

Verve 215a

600W + 150W - 129dB SPL

Processed Active Reinforcement Loudspeaker

- > 2-way, bass-reflex, bi-amplified
- > **2x 380 mm (15") B&C custom neodymium woofer** with 75 mm (3") voice coil
- > **1x51 mm (2") B&C titanium compression driver** with 65 mm (2") voice coil
- > **600Wrms PWM LF amplifier**
- > **150Wrms Class G HF amplifier**
- > **Switch mode power supply** for an excellent weight/power ratio
- > Analog signal processor with limiter
- > Control panel with: ground lift, XLR input and output, 3-band EQ, limiter, protection LED, volume control

- > **60°H x 40°V rotatable horn**
- > **6xM10 anchoring points and 2 robust metal handles**
- > **18mm (0.7") birch plywood** scratch resistant enclosure
- > Ideal for sound reinforcement and permanent installations, possible horizontal array set-up of 3 speakers with total coverage of 120° and 138 dB maximum SPL/1m
- > Compact weight (49,5 Kg/109.12 Lb)

Verve 215

1400W / 4ohm - 132,5dB SPL

Sound Reinforcement Loudspeaker

- > Passive version, **1400Wrms/4ohm recommended amplifier**
- > Passive crossover filter featuring "soft-trip" circuitry to ensure full protection of the LF woofer and HF driver

Processed Active Reinforcement Monitor

- > 2-way, coaxial, bass reflex, bi-amplified
- > **B&C HF titanium compression driver with 44 mm (1.7") voice coil and 25 mm (1") exit** coaxially mounted to a **380 mm (15") B&C woofer** with 64 mm (2.5") voice coil
- > **350Wrms Class G LF amplifier**
- > **100Wrms Class G HF amplifier**

- > Analog signal processor with limiter
- > Control panel with: ground lift, XLR input and output, 2-band EQ (High/Low), limiter, protection LED, volume control
- > **90° angle dispersion**
- > **15mm (0.59") birch plywood** scratch resistant enclosure, 45° monitor profile
- > **2 metal handles**
- > Specifically designed for nearfield use as a stage monitor in live sound

events and touring, it has an exceptional dispersion coherence in the whole coverage angle without the lobing phenomena

Verve 15M

500W / 8ohm - 125dB SPL

Sound Reinforcement Monitor

- > Passive version, **500Wrms/8ohm recommended amplifier**
- > Passive crossover filter featuring "soft-trip" circuitry to ensure full protection of the LF woofer and HF driver
- > 2 NL-4 Neutrik™ Speakon inputs

Verve 12Ma

300W + 100W - 123dB SPL

Processed Active Reinforcement Monitor

- > 2-way, coaxial, bass reflex, bi-amplified
- > **B&C HF titanium compression driver with 36mm (1.4") voice coil and 25 mm (1") exit** coaxially mounted to a **320 mm (12") B&C woofer** with 50 mm (2") diameter voice coil
- > **300Wrms Class G LF amplifier**

> **100Wrms Class G HF amplifier**

- > Analog signal processor with limiter
- > Control panel with: ground lift, XLR input and output, 2-band EQ (High/Low), limiter, protection LED, volume control
- > **90° angle dispersion**
- > **15mm (0.59") birch plywood** scratch resistant enclosure, 45° monitor profile
- > **35 mm ø (1.38") Top-hat for speaker stand and 1 metal handle**

> Multi-functional enclosure design: full range "Front of House" speaker use or floor stage monitor

Verve 12M

300W / 8ohm - 123dB SPL

Sound Reinforcement Monitor

- > Passive version, **300Wrms/8ohm recommended amplifier**
- > Passive crossover filter featuring "soft-trip" circuitry to ensure full protection of the LF woofer and HF driver
- > 2 NL-4 Neutrik™ Speakon inputs

Verve 8Ma

150W + 50W - 117dB SPL

Processed Active Reinforcement Monitor

- > 2-way, coaxial, bass reflex, bi-amplified
- > **B&C HF titanium compression driver with 36 mm (1.4") voice coil and 25 mm (1") exit** coaxially mounted to a **200 mm (8") B&C woofer** with 50 mm (2") voice coil
- > **150Wrms Class G LF amplifier**

> **100Wrms Class AB HF amplifier**

- > Analog signal processor with limiter
- > Control panel with: ground lift, XLR input and output, limiter, protection LED, volume control
- > **90° angle dispersion**
- > **15mm (0.59") birch plywood** scratch resistant enclosure, 45° monitor profile
- > **4 x M6 omni-mount anchoring points**

> Specifically designed frequency response for nearfield use as a stage monitor

Verve 8M

250W / 8ohm - 119dB SPL

Sound Reinforcement Monitor

- > Passive version, **250Wrms/8ohm recommended amplifier**
- > Passive crossover filter featuring "soft-trip" circuitry to ensure full protection of the LF woofer and HF driver
- > 2 NL-4 Neutrik™ Speakon inputs

Verve 18Sa

600W - 126,5dB SPL
Processed Active
Reinforcement Subwoofer

- > Powered subwoofer in bass reflex design
- > **600Wrms Class D (PWM) amplifier**
- > **Switch mode power supply**
- > **460 mm (18") B&C ceramic woofer** with 76 mm (3") voice coil
- > Control panel with stereo XLR input and link, Hi-Pass filtered XLR outputs for mid-high

satellite connection, volume, limiter, ground-lift, 0° - 180° phase switch

- > **18 mm (0.7") birch plywood** scratch resistant enclosure
- > **6 x M10 anchoring points and 2 metal handles**
- > Very generous low frequency response **down to 35Hz**, compact weight and dimensions

Verve 15Sa

500W - 124,5dB SPL
Processed Active
Reinforcement Subwoofer

- > Powered subwoofer in bass reflex design
- > **500Wrms Class D (PWM) amplifier**
- > **Switch mode power supply**
- > **380 mm (15") B&C ceramic woofer** with 76 mm (3") voice coil
- > Control panel with stereo XLR input and link, Hi-Pass

filtered XLR outputs for mid-high satellite connection, volume, limiter, ground-lift, 0° - 180° phase switch

- > **18 mm (0.7") birch plywood** scratch resistant enclosure
- > **6 x M10 anchoring points and 2 metal handles**
- > Very generous low frequency response **down to 40Hz**, compact weight and dimensions

Verve 18S

1200W / 4ohm - 129dB SPL
Sound Reinforcement
Subwoofer

- > Passive version, **1200Wrms/4ohm recommended amplifier**
- > Input control panel with 2 NL-4 Neutrik™ Speakon inputs and link to facilitate connection of speakers in parallel
- > External electronic crossover is required
